

Table 1. Multi-variate linear regression of the total amount of vasopressor needed to maintain normal maternal blood pressure (P=0.08, R2=0.03, entire model).

	Beta Coefficient	95% Confidence interval		P value
		Lower	Upper	
Bupivacaine	384.51	68.96	700.07	0.02
Labor	-7.73	-98.05	82.60	0.87
Diabetes	22.95	-100.74	146.64	0.72
Depression	71.94	-15.83	159.70	0.11
