SOAP TITLES 1998

9801 SUTURING THE EPIDURAL CATHETER REDUCES THE INCIDENCE OF FAILED EPIDURAL BLOCK IN OBSTETRIC PATIENTS -- S Cohen, I Lowenwitt, CB Pantuck, et al

9801 SPINAL LIDOCAINE VS BUPIVACAINE FOR CESAREAN SECTION -- M Richardson, R Wissler, J Bedard, et al

9802 SYSTEM OPIOID USE IN LABOR: A 5 YEAR SURVEY FROM THE UK AND IRELAND -- J Durbridge, A Whitfield, A Holdcroft

9802 CANADIAN OBSTETRIC ANAESTHESIA SURVEY 1997: LABOR ANALGESIA -- TW Breen, T McNeil, L Dierenfield

9803 CANADIAN OBSTETRIC ANAESTHESIA SURVEY 1997: OPERATIVE ANAESTHESIA -- TW Breen, L Dierenfield, T McNeil

9803 A COMPARISON OF MATERNAL SATISFACTION BETWEEN EPIDURAL AND SPINAL ANESTHESIA FOR ELECTIVE CESAREAN SECTION -- PJ Morgan, S Halpern, J Evers

9804 MANUAL REMOVAL OF PLACENTA UNDER SPINAL ANESTHESIA: WHAT BLOCK HEIGHT IS NEEDED FOR PAIN FREE SURGERY? -- CR Broadbent, R Russell

9804 EFFECT OF LOW CONCENTRATION EPIDURAL BUPIVACAINE ON MOTOR AND SENSORY FUNCTION IN NON-LABORING PARTURIENTS - M Zakowski, G Ty, D Kwiatkowski, et al

9805 THE ADDITION OF BUPIVACAINE AND/OR EPINEPHRINE TO SUBARACHNOID FENTANYL IN LATE FIRST STAGE LABOR IN MULTIPAROUS PARTURIENTS -- CF Ciliberto, SR Goodman, SH Kim-Lo, et al

9806 POSTURE AND CARDIOVASCULAR CHANGES FOLLOWING CESAREAN SECTION -- E Bandi, F Carli, M Phil, SK Weeks

9806 INTRATHecal FENTANYL WITHNALBUPHINE FOR LABOR ANALGESIA -- E AM Faure, B Wittels, J Klafta, et al
| 9807 | EFFECTIVE DOSE INTRATHECAL MORPHINE WITH FENTANYL AND LOW-DOSE BUPIVACAINE IN EARLY LABOR -- CP Jayasinghe, SL Gibbons, EM Quevedo, NH Blass |
| 9807 | ENTRY CRITERIA IN A LOW-RISK BIRTH CARE CENTER AND RATES CESAREAN SECTION AND EPIDURAL ANALGESIA -- RSF McKay, GM Bassell |
| 9808 | ANESTHESIA PERSONNEL NEEDS AT A LOW-RISK BIRTH CARE CENTER COMPARED TO A TRADITIONAL UNIT -- RSF McKay, GM Bassell |
| 9808 | A COMPARISON OF 0.1 MG VERSUS 0.25 MG INTRATHECAL MORPHINE FOR ANALGESIA FOLLOWING CESAREAN SECTION -- T Yang, TW Breen, A Macarthur |
| 9809 | EPIDURAL ANALGESIA FOR LABOR: WHY DO SOME PARTURIENTS NOT RECEIVE OUR SERVICES? -- CD Drimbarean, DJ Birnbach, J Campagnuolo, et al |
| 9809 | DOES CSE EFFECT MATERNAL LACTATE LEVELS DURING LABOR? -- J Campagnuolo, DJ Birnbach, C Drimbarean, et al |
| 9810 | IN VITRO FERTILIZATION: DOES PAIN RESPONSE CORRELATE WITH ESTROGEN LEVEL? -- N Natale, L Tsen, S Eappen, et al |
| 9811 | ASSESSMENT OF PLASMA FIBRINOGEN AND PLATELET FUNCTION WITH THROMBOELASTOGRAPHY USING C7E3 FAB -- SK Sharma, J Philip |
| 9811 | MATERNAL KNOWLEDGE, EXPECTATIONS, CONCERNS AND EXPERIENCE WITH EPIDURAL ANALGESIA IN LABOR -- MJ Paech, LC Gurrin |
| 9812 | GLYCOPPYRROLATE REDUCES NAUSEA FROM SPINAL ANESTHESIA FOR CESAREAN SECTION WITHOUT AFFECTING APGAR SCORE -- D Ure, K James, M McNeill, JV Booth |
BREAKTHROUGH PAIN DURING ULTRA-LOW DOSE EPIDURAL ANALGESIA ASSOCIATED WITH DYSFUNCTIONAL LABOR -- PE Hess, TP Lucas, et al

ASSESSMENT OF REGIONAL BLOCKS FOR CESAREAN SECTION -- AJ Eldridge, R Russell

SPINAL CLONIDINE PROLONGS LABOR ANALGESIA FROM SPINAL SUFENTANYL AND BUPIVACAINE -- R D'Angelo, E Evans, L Dean, et al

CONTINUOUS EPIDURAL INFUSION OF HYDROMORPHONE PLUS BUPIVACAINE 0.05% DURING LABOR AND DELIVERY: SAFETY AND ANALGESIC EFFICACY -- R Sinatra, S Eige, L Fermo, et al

PROSPECTIVE ANALYSIS OF EPIDURAL ANALGESIA SAFETY AND EFFICACY DURING LABOR AND FOLLOWING DELIVERY UTILIZING A COMPUTERIZED DATABASE -- S Eige, F Sevarino, R Sinatra, et al

AIRWAY CHANGES DURING LABOR -- K B Shankar, L Bulich, R Dafiluddi, et al

SEGMENTAL EPIDURAL ANESTHESIA AND THE CONTRIBUTION OF JOHN GP CLELAND -- RB Clark, JE Cleland

A COMPARISON OF LIDOCAINE AND ROPIVACAINE AS INDICATORS OF INTRAVASCULAR INJECTION FOR EPIDURAL ANESTHESIA -- MD Goodrich, FJ Speilman, DC Mayer, et al

FACTORS RESPONSIBLE FOR ACCIDENTAL DURAL PUNCTURE IN PARTURIENTS -- RV Prasad, FJ Spielman, DC Mayer

THE OPTIMAL DOSE OF EPIDURAL ROPIVACAINE FOR USE DURING LABOR AND DELIVERY -- MA Galea, Y Beilin, J Zahn, et al

NERVE INJURIES IN POSTPARTUM PATIENTS AFTER REGIONAL ANALGESIA/ANESTHESIA -- CA Wong, BM Scavone, SJ Gordon

5% HYPERBARIC SPINAL LIDOCAINE IS NOT ASSOCIATED WITH TRANSIENT RADICULAR IRRITATION IN OBSTETRIC PATIENTS -- CA Wong, SJ Gordon

REMITFENTANIL DOES NOT PROVIDE ADEQUATE LABOR ANALGESIA -- AJ Olufolabi, DH Penning, H Wakeling, et al
9819 ILIOHYPOGASTRIC AND ILIOINGUINAL NERVE BLOCKS AND ORAL NAPROXEN SODIUM REDUCE USE OF MORPHINE PCA AFTER CESAREAN SECTION: A RANDOMIZED PLACEBO-CONTROLLED TRIAL EA Bell, R Greengrass, T Spahn, et al

9820 A COMPARISON BETWEEN MEPERIDINE AND BUPIVACAINE/FENTANYL FOR COMBINED SPINAL EPIDURAL LABOR ANALGESIA -- DR Lindsay, JD Reynolds, H El-Moalem, et al

9820 KETAMINE 0.25MG BOLUS FOLLOWED BY 0.25MG/KG/HR LOW DOSE INFUSION IS EFFECTIVE IN RELIEVING LABOR PAIN -- M Maroof, S Hamim RM Khan, SM Ahmad

9821 ROPIVACAINE 7.5MG/ML IS EQUALLY EFFECTIVE AS BUPIVACAINE 5MG/ML FOR EPIDURAL ANESTHESIA DURING CESAREAN SECTION E Bjomestad, JP Smedvig, G Narverud, et al

9821 FACTORS THAT INFLUENCE CESAREAN SECTION RATE IN PATIENTS RECEIVING DILUTE EPIDURAL INFUSIONS FOR LABOR AND DELIVERY ANALGESIA: A PROSPECTIVE ANALYSIS -- F Sevarino, R Sinatra, L Fermo, et al

9822 FACTORS THAT INFLUENCE CESAREAN SECTION RATE IN PRIMIPARAS RECEIVING DILUTE EPIDURAL INFUSIONS FOR LABOR AND DELIVERY ANALGESIA: A PROSPECTIVE ANALYSIS -- F Sevarino, R Sinatra, L Fermo, et al

9822 ROPIVACAINE VS BUPIVACAINE FOR LABORING PATIENTS -- JP Dagirmanjian, D Gupta, MR Hoyt et al

9823 NEW POSITIONING TECHNIQUE IMPROVES HEMODYNAMIC STABILITY AND PREDICTABILITY OF BLOCK HEIGHT DURING OBSTETRIC SPINAL ANESTHESIA -- M Stoneham, J Eldridge, M Popat, R Russell

9823 EPIDURAL LOADING DOSES FOR WOMEN IN LABOR - A BLINDED RANDOMIZED COMPARISON OF LOW DOSE ROPIVACAINE AND BUPIVACAINE -- AJ Edlridge, R Russel

9824 A COMPARISON OF EXTRADURAL BOLUS ADMINISTRATION OF BUPIVACAINE 0.25% AND BUPIVACAINE 0.1% WITH 0.0002% FENTANYL FOR LABOR ANALGESIA -- I Quasim, KS James, EM McGrady, A Patrick

9824 COMPARISON OF TWO EXTRADURAL SOLUTIONS FOR CESAREAN SECTION -- M Patel, L Jordan
9825  SUBARACHNOID FENTANYL FOR ELECTIVE CAESAREAN SECTION --
M Patel, L Jordan

9825  A COMPARISON OF 0.5% LEVOBUPIVACAINE WITH 0.5%
BUPIVACAINE FOR EXTRADURAL ANESTHESIA IN PATIENTS
UNDERGOING ELECTIVE CESAREAN SECTION -- A Simpson, K Faccenda,
D Henderson, et al

9826  SUBJECTIVE FACTORS ASSOCIATED WITH THE OCCURRENCE OF
ACCIDENTAL DURAL PUNCTURE IN LABORING PARTURIENTS -- AK
Soni, PE Hess, TP Lucus

9826  DYNAMOMETRIC EVALUATION OF MOTOR BLOCK WITH
INTRATHECAL SUFENTANIL/BUPIVACAINE LABOR ANALGESIA -- CM
Viscomi, NL Pace, PL Bailey

9827  QUANTITATIVE EVALUATION OF SENSORY BLOCKADE FOLLOWING
INTRATHECAL SUFENTANIL IN PARTURIENTS -- D Gambling, M
Wallace, A Leung, et al

9827  THE OBSTETRICIAN'S ABILITY TO ASSESS THE AIRWAY -- ET
McGonigal, RR Gaiser, TG Cheek

9828  THRESHOLD DETERMINATION OF QUALITY ASSURANCE
INDICATORS IN OBSTETRICAL ANESTHESIA -- D Sabo, S Ramanathan

9828  EPIDURAL ROPIVACAINE-FENTANYL INFUSION CAUSES LESS MOTOR
BLOCK THAN BUPIVACAINE-FENTANYL INFUSION IN LABORING
PARTURIENTS -- H Finegold-Gammon, G Mandell, M Cascio, et al

9829  EPIDURAL BLOOD PATCH AS A CLINICAL INDICATOR IN
OBSTETRICAL ANESTHESIA -- A Pue, O Ellis, D Poeltler

9829  INTRATHECAL FENTANYL AND SUFENTANIL DURING LABOR -- N
Syed, JE Fletcher, W Jones, et al

9830  ROPIVACAINE 7.5MG/ML VS BUPIVACAINE 5MG/ML FOR C SECTION --
D Writer, J Scovil, J Pridham, et al

9830  LONG QT SYNDROME PREGNANCY - A CASE REPORT AND REVIEW --
GJ Sharpe

9831  SPLENIC ARTERY ANEURYSM RUPTURE ASSOCIATED WITH
PREGNANCY FOLLOWING ORTHOTOPIC LIVER TRANSPLANTATION --
P Periris, GM Vasdev, LC Torsher
INTENSIVE CARE UNIT ADMISSION FOLLOWING DELIVERY: INCIDENCE AND OUTCOME IN A STATEWIDE POPULATION -- S Panchal, MJ Sendak, AP Harris

ANALYSIS OF OPIOID AND NON-OPIOID AGENTS, AND OXYTOCIN BY HIGH-PERFORMANCE LIQUID CHROMATOGRAPHY -- ME Ward, ER Vickers

DOES EPIDURAL ANALGESIA INFLUENCE BREAST-FEEDING OUTCOMES SIX WEEKS POST-PARTUM -- S Halpern, J MacDonnell, T Levine, D Wilson

LUMBER SYMPATHETIC BLOCKS MAY SPEED CERVICAL DILATION -- AM Rice, BL Leighton, SH Halpern

USE OF DRUG INFUSION BALLOON (DIS) SYSTEM IN THE MANAGEMENT OF LABOR PAIN -- ZP Dadabhoy, ML Torres, NF Nasr, AP Winnie

EFFECT OF CHANGES IN LABOR ANALGESIA RATES ON THE "EPIDURAL TO CESAREAN" RATE: CLINIC VERSUS PRIVATE PATIENTS -- RM Smiley, CF Ciliberto, SR Goodman, JD Freidlander

EPINEPHRINE IS NOT A USEFUL ADDITION TO INTRATHECAL FENTANYL OR FENTANYL-BUPIVACAINE FOR LABOR ANALGESIA -- SR Goodman, SH Kim-Lo, CF Ciliberto, et al

PREVENTION OF SIDE-EFFECTS DURING CESAREAN SECTION UNDER SPINAL ANESTHESIA -- A Fabrizi, CT Crochetiere, L Roy, et al

RESPIRATORY DEPRESSION IN PARTURIENTS WHO RECEIVE INTRATHECAL SUFENTANIL ALONE OR FOLLOWING TV OPIOIDS-AN OBSERVATIONAL STUDY -- P Atkinson, HJ Huffnagle, S Huffnagel, et al

DOES EPINEPHRINE IMPROVE THE DIAGNOSTIC ACCURACY OF ASPIRATION IN LABORING WOMEN? -- MC Norris, H Dalman, ST Fogel, et al

CARDIOVASCULAR EFFECTS OF HIGH DOSE INTRAVENOUS NITROGLYCERIN FOR UTERINE RELAXATION IN LABOR -- AS Dueloy-Bouthors, JC Ducloy, D Huet-Garrigue, et al

THE MATERNAL HAEMODYNAMIC RESPONSE TO LOW DOSE SPINAL AND EPIDURAL IN PRE-ECLAMPSIA -- AH Shennan and FI Osuagwu
COMPREHENSIVE OBSTETRIC/NEONATAL RESEARCH DATABASE (CORD): II. TRACKING QUALITY IMPROVEMENT -- Y Olufolabi, E Bell, E Myers, et al
