

SOAP & OpenAnesthesia present:

OB Anesthesia Fellows Virtual Grand Rounds

Online
June
11th!

Ruth Landau, MD

Virginia and Prentice Bloedel Prof. of Anesthesiology
Director of Obstetric Anesthesia and Clinical Genetics Research
Department of Anesthesiology and Pain Medicine
University of Washington Medical Center
Seattle, WA

Webinar on preeclampsia – the cutting edge in current & future research

Preeclampsia has been named decades ago the 'disease of theories'. Suffice is to say that 30,157 publications on preeclampsia have been published since 1914 which attests the fascination the medical community has for this disease.

- Epidemiological studies underscore that pre-eclampsia is not just a disease of pregnancy that resolves with delivery. In fact, pre-eclampsia may be considered a 'risk marker' for later-life diseases, including cardiovascular and renal diseases and metabolic syndrome in the mother.
- Epigenetic regulation is key for placental development and disturbed placental epigenetics is involved in the pathogenesis of pre-eclampsia, with an impact not only in the development of the syndrome with maternal and fetal consequences, but also disease susceptibility in later life for both mother and offspring.
- Anti-angiogenic factors and endothelial dysfunction provide the potential for biomarkers that could allow early prediction and detection of pre-eclampsia, and a novel promising target for therapeutic strategies.

Date/Time: Wednesday, June 11, 2014 at 12:00 PM PST/3:00 PM EST

Location: <https://global.gotomeeting.com/join/782541565>

Audio: Use your microphone and speakers (VoIP) – a headset is recommended.

Or, dial (646) 982-0000

Access Code: 782-541-565

Audio PIN: Shown after joining the meeting

Meeting ID: 782-541-565
