Chief, Obstetric Anesthesia Division
Vice Chair, Faculty Development
Dept. of Anesthesia, Critical Care & Pain Med.
Massachusetts General Hospital

Neurological Disease and Neuraxial Anesthesia: Pathways to Success!

Neurological comorbidities in pregnant patients are common, and range from benign conditions (e.g. lumbar disc disease) to rare or serious conditions such as brain tumors or multiple sclerosis. We will discuss a systematic approach that enables rational decisions about which patients are suitable candidates for neuraxial anesthesia, and which need special considerations if general anesthesia is needed.

Date/Time: Wednesday, June 10, 2015 at 12:00 PM PST/3:00 PM EST

Location: <https://global.gotomeeting.com/join/706362701>

Audio: Use your microphone and speakers (VoIP) - a headset is recommended.

Or, dial (619) 550-0003

Access Code: 706-362-701

Audio PIN: Shown after joining the meeting
