Program Director, Obstetric Anesthesiology
Fellowship
Vanderbilt University Medical Center
Nashville, Tennessee

Understanding why mothers die: Benefits & challenges of systematic study of maternal mortality

Maternal mortality is uncommon, yet occurs with a real incidence (nearly 2 per 10,000 pregnancies in the US), with contributing factors that are modifiable making death potentially preventable. We examine the history of the study of maternal mortality, benefits to practice changes that improve maternal safety, and challenges facing us in the US.
